The Elegance, Efficiency and Economy of Vinyl Windows

PRO-TEC Series

Attractive Design Adds Classic Beauty To Your Home

You want your home to reflect your taste and style. Our vinyl windows will help give your home the look you desire. Their clean lines will enhance your home's appearance and architectural style.

Whether your home is traditional or contemporary, your choice of our vinyl windows in double hung or slider designs, will give your home a beautiful new look inside and out.

Our windows are made from a specially-formulated vinyl that performs beautifully and provides an insulating value that is far superior to wood and aluminum windows. The color white goes clear through the vinyl, so scratches and nicks don't show. And the exterior surface is so tough, it will withstand the severest weather conditions and be unaffected by the damage which can be caused by pollution, salt air, heat, cold, humidity and dirt. Also, the vinyl will never chip, flake, rust, rot, blister or peel.

Year after year, they will retain their good looks without painting or puttying. They will reduce energy costs, making your home more cozy and comfortable, adding value, beauty, while saving you money on maintenance and fuel costs for heating and cooling.

Double and triple sliders offer beautiful, unobstructed views.

Both sash tilt in for easy cleaning from inside your home.

Quality and Performance Are An Added Value

- Our window is *designed* for energy-efficient, weathertight performance.
- Multi-chambered construction adds a new dimension to window performance, with extra strength and thermal efficiency.
- Double weatherstripping and full interlock system seal out moisture and provide draft-free, leak-free performance for energy savings and enhanced comfort.
- Colonial or diamond grilles between the glass are available for extra styling without extra maintenance.
- Self-locking half-screen is standard. Full screen is available.
- Top and bottom sashes tilt in for quick and safe cleaning.

- Sill slopes out to permit water run off for extra weather performance.
- 7/8" double glazing for thermal efficiency and reduced noise infiltration. Low-E glass and Argon gas available for extra energy savings.
- Precision telescoping butt corners for strength, weathertight construction.
- Recessed hardware provides a neat, clean appearance.
- Full interlock at meeting rails to reduce air infiltration.
- Metal-reinforced horizontal rails for enhanced strength, stability.
- Vent lock for controlled sash ventilation.
- Decorative balance covers add beauty.

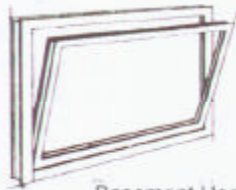

Distinctive Window Styles and A Smart Investment

Our vinyl windows with their unique sash construction provides extra strength, beauty and exceptional performance for a lifetime of value for your home. They add a clean, trim look to both the interior and exterior of your home, while eliminating maintenance chores, drafts, energy loss and other problems of your older windows.

Each window is custom-made to the exact measurements of your window opening and installation is being done by trained professionals,

with most jobs being completed within one day. Our vinyl windows are designed to meet or exceed all industry standards and local and national codes. They are built to handle all of our local weather conditions, as well.

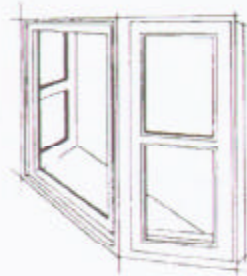

So, start reducing your home's energy losses and enhance its comfort, value and appearance by installing our vinyl windows, today. They're available in a wide variety of styles to suit virtually every design need.
